

COMING SOON TO A SOCIAL TOWN NEAR YOU!

Unleashing the Superpowers Within: Teaching through Social Detective & Superflex Quests

Welcome to the Superflex Academy, where you'll learn to teach kids ages 7-11+ core social concepts through the lens of a social detective and superhero adventure. You'll get a sneak peek at a handful of the 35 core lessons from the new Social Detective and Superflex Curriculums and teaching guides. (New Superflex curriculum due in early 2024).

Each of the 35 lessons/quests feature:

- ✓ Materials to prepare
- ✓ Lesson purpose
- ✓ Why the social concepts matter for students
- ✓ A step-by-step curriculum guide with supplemental print and visual supports (PowerPoints, downloadable Thinksheets)

Early lessons begin by giving students tools to become social observers and interpreters. Students become detectives and learn about their own strengths to gather clues to figure out social situations.

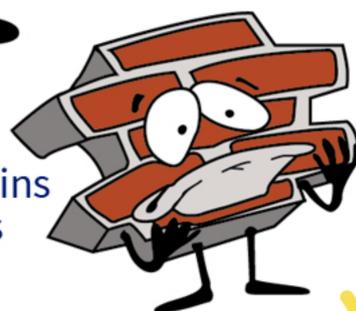

Teaching then expands into building self-regulation and problem solving through superhero adventures. Some lessons include imaginary characters (**UnthinkaBots**) that represent characteristics and struggles WE ALL have.

For Example:

Rock Brain uses StuckBots to make all of us get stuck on doing things only one way

Worry Wall uses WorryBots to make our brains magnify worries

Worry Wiseworm is the knowledgeable worm who teaches Worry Wisdoabout whether a worry is a Wee-Tiny worry, a Wise Worry, or a WorryBot

T-Flex is a flexible thinking and flexible doing T-Rex who activates Flex-a-Do powers and strategies

However, for each of the 14 core UnthinkaBots, there are 14 core **Thinkables** who equip learners with proactive strategies for problem solving through the lens of using their own unique superpowers on their quest to transform into their own Superflex.

Here are a couple of Thinkables:

So, pull out your detective magnifying glasses and fasten your capes and join other professionals and parents for a day of cooperative learning about these award-winning social, emotional, and academic resources for students ages 7-11+.

Empower your students & children to transform into their own Superflex Superheroes!
