

LESSON 2: Thinking about MY SMARTS!

Write or draw a picture inside the boxes below to show some of the types of SMARTS you have in your brain. Here are some ideas to get you started:

- Math smarts
- Insect smarts
- Reading smarts
- Unicorn smarts
- Making friends smarts
- Kickball smarts

The diagram shows a child's head with a brain divided into eight distinct, colorful sections: red, yellow, pink, purple, green, blue, orange, and light blue. Eight empty rectangular boxes are arranged in a 2x4 grid to the left of the head. Arrows point from each box to one of the brain sections, providing a space for students to identify and describe their own strengths.
